Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-14 and 26 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Rando.
3. Rando describes using a laser beam with alternative masks (FIGS 3 and 4) which are described as the the masks as claimed.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 15-25 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rando.

Art Unit: 2859

6. Rando discloses the invention substantially as claimed. However, Rando does not disclose the further optical elements (claims 15-25) or the conductive spring (claim 27) as claimed. Official Notice is taken that the further claimed optical elements are old and well-known means used for the purpose of further processing a laser beam for a particular application. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the claimed optical elements in conjunction with the device of Rando for the purpose of customizing the Rando device for a particular application. Official Notice is also taken that using a conductive spring is an old and well-known means used for the purpose of supporting a pendulum and providing power to a laser on the pendulum. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use a conductive spring in conjunction with the pendulum of Rando for the purposes of both suspending the pendulum and providing power to the pendulum.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
